Issue Number 4, April 2009

269–282	REVIEW: The skeletal phenotypes of TRα and TRβ mutant mice	J H Duncan Bassett & Graham R Williams
283–289	REVIEW: Hexose-6-phosphate dehydrogenase: linking endocrinology and metabolism in the endoplasmic reticulum	Gábor Bánhegyi, Miklós Csala & Angelo Benedetti
291–303	Effects of FSH on testicular mRNA transcript levels in the hypogonadal mouse	M H Abel, D Baban, S Lee, H M Charlton & P J O'Shaughnessy
305–318	Glycine-extended gastrin inhibits apoptosis in Barrett's oesophageal and oesophageal adenocarcinoma cells through JAK2/STAT3 activation	Ian L P Beales & Olorunseun O Ogunwobi
319–330	Role of angiotensin II-induced rapid response genes in the regulation of enzymes needed for aldosterone synthesis	Edson F Nogueira, Yewei Xing, Claudia A V Morris & William E Rainey
331–339	Calcium-sensing receptor mutations and denaturing high performance liquid chromatography	David E C Cole, Francisco H J Yun, Betty Y L Wong, Andrew Y Shuen, Ronald A Booth, Alfredo Scillitani, Svetlana Pidasheva, Xiang Zhou, Lucie Canaff & Geoffrey N Hendy
341–356	Structure and function of the human Gly1619Arg polymorphism of M6P/IGF2R domain 11 implicated in IGF2 dependent growth	Dellel Rezgui, Christopher Williams, Sharon A Savage, Stuart N Prince, Oliver J Zaccheo, E Yvonne Jones, Matthew P Crump & A Bassim Hassan
357	Erratum	
359	Erratum
