## Number 2 · April 1990

93–99	Differential regulation of calbindin- $D_{28K}$ mRNA in the intestine and eggshell gland of the laying hen	A. Bar, S. Striem, S. Mayel-Afshar & D. E. M. Lawson
101–106	Developmental and hormonal regulation of a mouse mammary tumour virus glycoprotein in normal mouse mammary epithelium	F. F. Bolander & M. E. Blackstone
107–117	Inducible anti-sense RNA for angiotensinogen in stably transformed hepatoma cell lines	W. M. Clouston, C. J. Lloyd & R. I. Richards
119–125	Synergistic effects of progesterone and oestradiol on rat LH subunit mRNA	M. Corbani, R. Counis, E. Wolinska-Witort, G. d'Angelo-Bernard, M. Moumni & M. Jutisz
127–134	Thyroidal inhibition of growth hormone secretion in fowl: tri-iodothyronine-induced down-regulation of thyrotrophin-releasing hormone-binding sites on pituitary membranes	S. Harvey & J. S. Baidwan
135–142	Molecular cloning of cDNA for porcine prolactin precursor	Y. Kato, T. Hirai & T. Kato
143–150	Partial cDNA sequence for the donkey chorionic gonadotrophin- $\beta$ subunit suggests evolution from an ancestral LH- $\beta$ gene	S. E. A. Leigh & F. Stewart
151–158	Poly(A) tail length of oxytocin- and lysine vasopressin-encoding mRNAs increases during development in the porcine hypothalamus	M. Rehbein & D. Richter
159–167	Comparison of the pretranslational regulation of FSH synthesis by gonadal steroids in rats and mice	D. A. Rodin, S. D. Abbot, G. Saade & R. N. Clayton
169–175	Expression of the human pro-opiomelanocortin gene introduced into a rat glial cell line	T. Usui, Y. Nakai, T. Tsukada, H. Takahashi, J. Fukata, Y. Naito, S. Nakaishi, T. Tominaga, N. Murakami & H. Imura
177–185	Transmembrane $\text{Na}^+/\text{H}^+$ exchange in the rat thyroid cell strain FRTL-5: a possible role in insulin-like growth factor-I-mediated proliferation	D. J. Woods, J. Soden, S. Tomlinson & S. P. Bidey
187–190	Rapid communication: Multiple DNA elements determine basal and thyroid hormone regulated expression of the human glycoprotein $\alpha$ subunit gene in pituitary cells	N. J. Balfour, J. A. Franklyn, J. A. Gurr & M. C. Sheppard
191	Announcements	

---

## Number 3 · June 1990

193–199	Thyrotrophin regulation of apical and basal exocytosis of thyroglobulin by porcine thyroid monolayers	M. Chambard, D. Depetris, D. Gruffat, S. Gonzalvez, J. Mauchamp & O. Chabaud
---------	---	--

---

201–211	Molecular cloning, sequence analysis and expression of putative chicken insulin-like growth factor-I cDNAs	D. H. Fawcett & G. Bulfield
213–221	Somatostatin binding to chicken adenohypophysial membranes	S. Harvey, D. Attardo & J. S. Baidwan
223–230	Desensitization of thyrotrophin-releasing hormone (TRH)-induced growth hormone secretion in chickens: coincident down-regulation of TRH binding to pituitary membranes	S. Harvey & J. S. Baidwan
231–237	Evidence for differential effects of noradrenaline and somatostatin on intracellular messenger systems in rat islets of Langerhans	R. D. Hurst & N. G. Morgan
239–245	Alteration in the expression of genes for cholesterol side-chain cleavage enzyme and 21-hydroxylase by hypophysectomy and ACTH administration in the rat adrenal	T. Imai, H. Seo, Y. Murata, M. Ohno, Y. Satoh, H. Funahashi, H. Takagi & N. Matsui
247–255	Differential expression of inhibin $\alpha$ and $\beta$ A subunit genes in rat and mouse ovarian follicles during pregnancy	J. D. Penschow, G. P. Aldred, P. A. Darling, J. Haralambidis, V. E. Hammond, B. H. van Leeuwen, A. J. Mason, H. D. Niall, P. Seeburg & J. P. Coghlan
257–264	Molecular cloning and sequence analysis of the cDNA for the putative $\beta$ subunit of the type-II gonadotrophin from the European eel	B. Qu�erat, M. Moumni, M. Jutisz, Y. A. Fontaine & R. Counis
265–274	Activation of mouse osteoblast growth hormone receptor: c-fos oncogene expression independent of phosphoinositide breakdown and cyclic AMP	M. C. Slootweg, S. T. van Genesen, A. P. Otte, S. A. Duursma & W. Kruijer
275–282	Structure of an interferon- $\alpha$ 2 gene expressed in the bovine conceptus early in gestation	H. J. Stewart, S. H. E. McCann & A. P. F. Flint
283–291	Pregnancy-blocking progesterone antibody targets specifically the uterus through its progesterone-binding sites	M. -W. Wang, A. Whyte, R. B. Heap & M. J. Taussig
293	Announcements	
295–299	Indexes to Volume 4
