Issue Number 2, February 2008

37–45	REVIEW: A focus on the role of Pax4 in mature pancreatic islet β -cell expansion and survival in health and disease	Thierry Brun & Benoit R Gauthier
47–59	Disruption of the striated muscle glycogen-targeting subunit of protein phosphatase 1: influence of the genetic background	James Paterson, Ian R Kelsall & Patricia T W Cohen
61–73	Estrogen receptor-related receptor α (ERR α) regulates osteopontin expression through a non-canonical ERR α response element in a cell context-dependant manner	Ralph A Zirngibl, Janet S M Chan & Jane E Aubin
75–91	Identification of transcriptional regulatory elements in the human somatostatin receptor sst2 promoter and regions including estrogen response element half-site for estrogen activation	Nobuko Kimura, Nobuko Takamatsu, Yoshio Yaoita, R Yoshiyuki Osamura & Narimichi Kimura
93–100	Durable islet effects on insulin secretion and protein kinase A expression following exendin-4 treatment of high-fat diet fed mice	Maria Sörhede Winzell & Bo Ahrén
