The Society for Endocrinology is one of the world’s leading authorities on hormones. Established in 1946, the Society’s aims are to support the advancement of scientific and clinical knowledge and increase research in endocrinology for the public benefit. It also plays a vital role in promoting and supporting endocrinology worldwide.

The Society for Endocrinology offers a range of journals including Journal of Endocrinology, Journal of Molecular Endocrinology, Endocrine-Related Cancer, Endocrine Connections (open access) and Clinical Endocrinology.

COVER ART COMPETITION

Readers are invited to submit their endocrinology images for entry into the Journal of Molecular Endocrinology cover art competition. Winners will be selected by the Editor-in-Chief and will have their imagery featured on the cover of an issue of Journal of Molecular Endocrinology, both in print and online. Winners will be cited in the journal and will receive a professionally printed copy of the journal cover featuring their scientific image.

To enter the competition please email your images to jme@endocrinology.org accompanied with a short caption of 25-30 words explaining what the image depicts, its magnification and who should be acknowledged for its production. Images should be of high quality and resolution of at least 300 dpi at the final published size 220 mm (W) × 100 mm (H).

By submitting an image you warrant that you own the copyright and agree that images may be used in promotional material. Images not selected for use may still be used by the Society for Endocrinology and Bioscientifica for promotional purposes.

THIS ISSUE’S COVER

Controversy exists over whether mature sperm are responsive to vitamin D or express its cognate receptor, VDR. This issue’s cover image shows that mouse sperm, in addition to caput epididymis epithelial cells, express the vitamin D receptor. Magnification 1000X.

CONTENTS

VOLUME 52 NUMBER 1

REVIEWS

Interactions between endocrine and circadian systems  R1-R16
Anthony H Tsang, Johanna L Barclay & Henrik Oster

FOXO2: a central transcription factor of the ovary  R17-R33
Adrien Georges, Aurelie Auguste, Laurianne Basissière, Anne Vanet, Anne-Laure Todascini & Reiner A Voitla

The islet ghrelin cell  R35-R49
Nils Wierup, Frank Sundler & R Scott Heller

A new link between diabetes and cancer: enhanced WNT/β-catenin signaling by high glucose  R51-R66
Custodia García-Jiménez, Jose Manuel García-Martínez, Ana Chocarro-Calvo & Antonio De la Vieja

cAMP in the pituitary: an old messenger for multiple signals  R67-R77
Erika Peverelli, Giovanna Mantovani, Andrea G Lania & Anna Spada

Network analysis: a new approach to study endocrine disorders  R79-R93
A Stevens, C De Leonibus, D Hanson, A W Doeyse, A Whatmore, S Meyer, R P Donn, P Chatelain, I Banerjee, K E Cosgrove, P E Clayton & M J Donn

Prolactin actions  R95-R106
Nelson D Horseman & Karen A Gregerson

Action of GH on skeletal muscle function: molecular and metabolic mechanisms  R107-R123
Viral Chikani & Ken Y K Ho

RESEARCH

3,5-di-iodothyronine stimulates tilapia growth through an alternate isoform of thyroid hormone receptor β1  1-9
Pamela Navarrete-Ramírez, Maricela Luna, Carlos Valverde-R & Aurea Orozco

Functional characteristics of neonatal rat β cells with distinct markers  11-28
G A Martens, E Motté, G Kramer, G Stangé, L W Gaarn, K Hellemans, J H Nielsen, J M Aerts, Z Ling & D Pipeleers
