CONTENTS

VOLUME 53 NUMBER 3

REVIEWS
PI3K/PTEN/Akt and TSC/mTOR signaling pathways, ovarian dysfunction, and infertility: an update R103–R118
Annu Makker, Madhu Mati Goel & Abbas Ali Mahdi
β-cell regeneration and differentiation: how close are we to the ‘holy grail’? R119–R129
Gienna Tan, Andrew G Elefanty & Edouard G Stanley

RESEARCH
1,25-Vitamin D₃ promotes cardiac differentiation through modulation of the WNT signaling pathway 303–317
Su M Hlaing, Leah A Garcia, Jaime R Contreras, Keith C Norris, Monica G Ferrini & Jorge N Artaza
Functions of the DRY motif and intracellular loop 2 of human melanocortin 3 receptor 319–330
Hui Huang & Ya-Xiong Tao
Actions of 1,25(OH)₂-vitamin D₃ on the cellular cycle depend on VDR and p38 MAPK in skeletal muscle cells 331–343
Ana P Irazoqui, Ricardo L Boland & Claudia G Buitrago

Bisphenol A enhances adipogenic differentiation of human adipose stromal/stem cells 345–353
Jason P O’Hearn, Amy L Strong, John A McLachlan, Jeffrey M Gimble, Matthew E Burrow & Bruce A Bunnell

Free fatty acid receptor 2, a candidate target for type 1 diabetes, induces cell apoptosis through ERK signaling 367–380
Guojun Shi, Chen Sun, Weiqiong Gu, Minglan Yang, Xiaofang Zhang, Nan Zhai, Yan Lu, Zhilei Shen & Guang Ning

Hyperinsulinemia induces hepatic iron overload by increasing liver TFR1 via the PI3K/IRP2 pathway 381–392
Xin Jiang, Heyang Wang, Wencai Shi, Zhilei Shen, Hui Shen & Min Li

In vivo oestrogenic modulation of Egr1 and Pitx1 gene expression in female rat pituitary gland 355–366
Alina Gajewska, Andrzej P Herman, Ewa Wolinska-Wittorf, Kazimierz Kochman & Lech Zwierzchowski

Free fatty acid receptor 2, a candidate target for type 1 diabetes, induces cell apoptosis through ERK signaling 367–380
Guojun Shi, Chen Sun, Weiqiong Gu, Minglan Yang, Xiaofang Zhang, Nan Zhai, Yan Lu, Zhilei Shen & Guang Ning

Hyperinsulinemia induces hepatic iron overload by increasing liver TFR1 via the PI3K/IRP2 pathway 381–392
Xin Jiang, Heyang Wang, Wencai Shi, Zhilei Shen, Hui Shen & Min Li

The Society for Endocrinology is one of the world's leading authorities on hormones. Established in 1946, the Society's aims are to support the advancement of scientific and clinical knowledge and increase research in endocrinology for the public benefit. It also plays a vital role in promoting and supporting endocrinology worldwide.

The Society for Endocrinology offers a range of journals including Journal of Endocrinology, Journal of Molecular Endocrinology, Endocrine-Related Cancer, Endocrine Connections (open access) and Clinical Endocrinology.

For more information visit www.endocrinology.org

Readers are invited to submit their endocrinology images for entry into the Journal of Molecular Endocrinology cover art competition. Winners will be selected by the Editor-in-Chief and will have their imagery featured on the cover of an issue of Journal of Molecular Endocrinology, both in print and online. Winners will be cited in the journal and will receive a professionally printed copy of the journal cover featuring their scientific image.

To enter the competition please email your images to jme@endocrinology.org accompanied with a short caption of 25-30 words explaining what the image depicts, its magnification and who should be acknowledged for its production. Images should be of high quality and resolution of at least 300 dpi at the final published size 220 mm (W) × 100 mm (H).

By submitting an image you warrant that you own the copyright and agree that images may be used in promotional material. Images not selected for use may still be used by the Society for Endocrinology and Bioscientifica for promotional purposes.

The image depicts FFAR2 signalling involved in type 1 diabetes pathogenesis by inducing cell apoptosis of monocytes/macrophages through ERK signaling.

Contents continued from outside back cover

Aberrent miR199a-5p/caveolin1/PPARα axis in hepatic steatosis
Bo Li, Zhiguo Zhang, Huizhi Zhang, Kai Guan, Yan Lu, Dongsheng Cai & Guang Ning

SFRPS acts as a mature adipocyte marker but not as a regulator in adipogenesis
Rui Wang, Je Hong, Ruxin Lu, Maoping Chen, Min Xu, Wipong Gu, Yifei Zhang, Qinyun Ma, Fang Wang, Juan Shi, Jiqiu Wang, Weiqing Wang & Guang Ning

CRFRI activation protects against cytokine-induced β-cell death
Lykke Blaabjerg, Gitte L Christensen, Masahito Matsumoto, Talitha van der Meulen, Mark O Huising, Nils Billestrup & Wylie W Vale

THIS ISSUE’S COVER

Aberrant miR199a-5p/caveolin1/PPARα axis in hepatic steatosis
Bo Li, Zhiguo Zhang, Huizhi Zhang, Kai Guan, Yan Lu, Dongsheng Cai & Guang Ning

SFRPS acts as a mature adipocyte marker but not as a regulator in adipogenesis
Rui Wang, Je Hong, Ruxin Lu, Maoping Chen, Min Xu, Wipong Gu, Yifei Zhang, Qinyun Ma, Fang Wang, Juan Shi, Jiqiu Wang, Weiqing Wang & Guang Ning

CRFRI activation protects against cytokine-induced β-cell death
Lykke Blaabjerg, Gitte L Christensen, Masahito Matsumoto, Talitha van der Meulen, Mark O Huising, Nils Billestrup & Wylie W Vale
