CONTENTS

REVIEW
Oxidative and endoplasmic reticulum stress in β-cell dysfunction in diabetes
Sumaira Z Hasnain, Johannes B Prins & Michael A McGuickin
R33–R54

What’s new in estrogen receptor action in the female reproductive tract
Sylvia C Hewitt, Wipawee Winuthayanon & Nonneth S Koersch
R55–R71

RESEARCH
Erythropoietin regulates POMC expression via STAT3 and potentiates leptin response
Soumyadeep Dey, Xiaoxia Li, Ruffeng Teng, Mawadda Alnaeeli, ZhiYong Chen, Heather Rogers & Constance Tom Noguchi
55–67

H295R expression of melanocortin 2 receptor accessory protein results in ACTH responsiveness
Kazutaka Namba, Andrew X Chen, Adina F Turcu & William E Rainey
69–76

Expression and functional studies of the GDNF family receptor alpha 3 in the pancreas
Laure Nivlet, Joel Herrmann, Delia Esteban Martin, Aline Moulier, Christophe Orvain & Gérard Gradwohl
77–90

Transcription factor C/EBPβ promotes the transcription of the porcine GPR120 gene
Kun Chen, Ji-Dan Zhou, Fang Zhang, Fang Zhang, Rui-Rui Zhang, Meng-Ti Zhan, Xiao-Yin Tang, Bing Deng, Ming-Gang Lei & Yuan-Zhu Xiong
91–100

Maternal high-fat diet influences stroke outcome in adult rat offspring
Cheng-Cheng Lin, Bai Shao, YuLei Zhou, XiaoTing Niu & YuanShao Lin
101–112

Regulation of human subcutaneous adipocyte differentiation by EID1
Diana Vargas, Noriaki Shimokawa, Ryosuke Kaneko, Wendy Rosales, Adriana Parra, Angela Castellanos, Noriyuki Koibuchi & Fernando Lizcano
113–122

Contents continued from inside back cover
Thyroid hormone and vitamin D regulate VGF expression and promoter activity

Jo E Lewis, John M Brameld, Phil Hill, Dana Wilson, Perry Barrett, Francis J P Ebling & Preeti H Jethwa

Estrogen-dependent up-regulation of TRPA1 and TRPV1 receptor proteins in the rat endometrium

Contents continued from outside back cover

Thyroid hormone and vitamin D regulate VGF expression and promoter activity 123–134

Jo E Lewis, John M Brameld, Phil Hill, Dana Wilson, Perry Barrett, Francis J P Ebling & Preeti H Jethwa

Estrogen-dependent up-regulation of TRPA1 and TRPV1 receptor proteins in the rat endometrium 135–149

The Society for Endocrinology is one of the world’s leading authorities on hormones. Established in 1946, the Society’s aims are to support the advancement of scientific and clinical knowledge and increase research in endocrinology for the public benefit. It also plays a vital role in promoting and supporting endocrinology worldwide.

The Society for Endocrinology offers a range of journals including Journal of Endocrinology, Journal of Molecular Endocrinology, Endocrine-Related Cancer, Endocrine Connections (open access) and Clinical Endocrinology.

For more information visit www.endocrinology.org

Readers are invited to submit their endocrinology images for entry into the Journal of Molecular Endocrinology cover art competition. Winners will be selected by the Editor-in-Chief and will have their imagery featured on the cover of an issue of Journal of Molecular Endocrinology, both in print and online. Winners will be cited in the journal and will receive a professionally printed copy of the journal cover featuring their scientific image.

To enter the competition please email your images to jme@endocrinology.org accompanied with a short caption of 25-30 words explaining what the image depicts, its magnification and who should be acknowledged for its production. Images should be of high quality and resolution of at least 100 dpi at the final published size 220 mm (W) × 100 mm (H).

By submitting an image you warrant that you own the copyright and agree that images may be used in promotional material. Images not selected for use may still be used by the Society for Endocrinology and Bioscientifica for promotional purposes.

The Society for Endocrinology offers a range of journals including Journal of Endocrinology, Journal of Molecular Endocrinology, Endocrine-Related Cancer, Endocrine Connections (open access) and Clinical Endocrinology. For more information visit www.endocrinology.org

Cover art competition

The images depict multipolar mitotic spindles (right) in fibroblasts from a patient with short stature and insulin resistance due to truncation of the centriolar protein POC1A. A bipolar control is also shown (left). From Chen et al. 2015 55 147-158.

Credit: J-H Chen, Wellcome Trust-MRC Institute of Metabolic Science, Cambridge, UK.
