**COVER ART COMPETITION**

Readers are invited to submit their endocrinology images for entry into the *Journal of Molecular Endocrinology* cover art competition. Winners will be selected by the Editor-in-Chief and will have their imagery featured on the cover of an issue of *Journal of Molecular Endocrinology*, both in print and online. Winners will be cited in the journal and will receive a professionally printed copy of the journal cover featuring their scientific image.

To enter the competition please email your images to jme@endocrinology.org accompanied with a short (section of 20-30 words explaining what the image depicts, its magnification and who should be acknowledged for its production. Images should be of high quality and resolution of at least 300 dpi at the final published size 220 mm (W) x 100 mm (H).

By submitting an image you warrant that you own the copyright and agree that images may be used in promotional material. Images not selected for use may still be used by the Society for Endocrinology and Bioscientifica for promotional purposes.

**THIS ISSUE’S COVER**

The images depict labeling of GPR101 (green) in the anterior pituitary gland of female rat and rhesus monkey. A membranous and cytoplasmic distribution of GPR101 is observed in a subpopulation of rat somatotrophs (bottom right) and monkey gonadotrophs (top right; middle right), but not in monkey somatotrophs (top middle). Non-specific binding of the employed GPR101 antibody was excluded (top left). From Trivellin et al. 57:97-111.
