Supplementary figure 2 Correlations between MIR517C expression levels and DNA copy number in parathyroid tumours. MIR517C expression levels positively correlated with CNV7145628 ($r=0.466$, $P=0.002$; circles), CNV7147457 ($r=0.447$, $P=0.003$; squares) and CNV4008868 ($r=0.669$, $P=0.002$; triangles). Grey symbols, parathyroid adenomas; black symbols, parathyroid carcinomas; white symbols, metastases.
