Supplemental Figure 4: Pharmacological inhibition of 11β-HSD1 activity by BVT.2733 induces UCP1 expression. Primary brown preadipocytes were cultured for 6 days in the vehicle (con) or in the presence of 200 umol/L BVT.2733 (BVT.2733). Anti-UCP1 immunohistochemistry for visualization of UCP1 protein (original magnification, ×100.) were performed on day 6 postdifferentiated cells.
